19. Does this FAI include documented nonconformances?

☐ Yes

☐ No

Sign-off

The person who verified the forms should not be the same person who reviews and approves them. Signing Worksheet 1 closes out Worksheets 2 and 3, so sign last.

20. Verified by (name)	
21. Date verified	
22. Reviewed and approved by (name)	
23. Date approved	
24. Customer approval *if your customer requires it*	
25. Customer approval date	
26. Comments *optional*	

These are Cornett Consulting Company's own worksheets. They are not IAQG or SAE forms, neither organization endorses them, and they make no claim of compliance. IAQG publishes its official Rev C forms free on its forms page (iaqg.org/standards/forms), and also says that using AS9102 forms requires owning a copy of the standard, so buy the standard before you rely on either set. **Your customer's requirements and the current AS9102 revision come first.**
