Sheet	of

Column 6: write the specification, its form, class or type, and any permitted substitution. Column 9: whether the supplier's approval was verified, where your customer requires approved sources.

These are Cornett Consulting Company's own worksheets. They are not IAQG or SAE forms, neither organization endorses them, and they make no claim of compliance. IAQG publishes its official Rev C forms free on its forms page (iaqg.org/standards/forms), and also says that using AS9102 forms requires owning a copy of the standard, so buy the standard before you rely on either set. **Your customer's requirements and the current AS9102 revision come first.**
