CCC First Article Inspection Worksheets | Worksheet 3

Characteristic Accountability, Verification and Compatibility Evaluation

One row per ballooned characteristic. Fill in the header fields on every sheet and print extra sheets as needed.

1. Part Number	2. Part Name	3. Serial Number (if applicable)	4. FAIR Identifier

5. Char. No.	6. Reference Location (zone, sheet)	7. Designator (KC, CI, other)	8. Requirement (as on drawing, same units)	9. Results (actual value or pass/fail)	10. Designed or Qualified Tooling	11. Nonconformance No.	12. Comments

Sheet	of

Column 9: record the measured value for variable characteristics, not just "OK". Attach inspection or CMM reports that show actual values. Column 11 only if the result is out of tolerance.

These are Cornett Consulting Company's own worksheets. They are not IAQG or SAE forms, neither organization endorses them, and they make no claim of compliance. IAQG publishes its official Rev C forms free on its forms page (iaqg.org/standards/forms), and also says that using AS9102 forms requires owning a copy of the standard, so buy the standard before you rely on either set. **Your customer's requirements and the current AS9102 revision come first.**
